

## V<sub>2</sub> WHEELS

### QUICK FACTS

- ✓ *Patented Formula requires  
Only Water*
- ✓ *No Cerium Oxide Required*
- ✓ *Process Any Thickness of  
Glass without leaving  
wheel marks*
- ✓ *Clean, Brilliant Edges*
- ✓ *Cleaner Process,  
Extended Machine Life*

It is our goal to provide the most advanced surfacing and production products available.

To assure this, we are committed to research and product development, maintaining an in-depth knowledge of the latest advancements across a variety of surfacing technologies, and ongoing, comprehensive field research in the flat glass & mirror industry.

More than offer an extensive line of quality products, we strive to be a useful resource for your questions and unique applications. As we have for over 75 years, we stand ready to respond to your specific needs quickly and thoroughly with fast, dependable service and accurate technical assistance.

# INNOVATION...

## V<sub>2</sub> WHEELS

---

*Highly  
Polished Edges  
Using  
Water ONLY!*

---

## **OPTIMUM POLISHING**

Developed from the same exacting technology required in the polishing of ultracritical surfaces, V2 WHEELS polish any thickness of glass, delivering clean, brilliant finishes with virtually no wheel marks.

## **UNIQUE TO YOUR APPLICATION**

V2 POLISH AND PRE-POLISH WHEELS are available in a variety of dimensions or can be fabricated to your unique specifications.

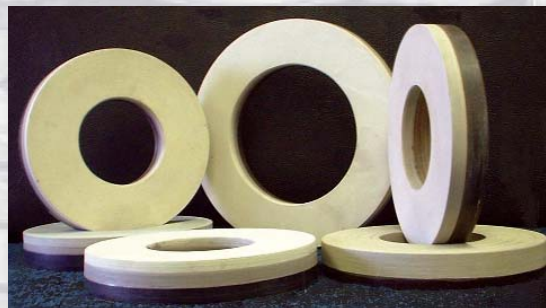

## **POLISH EDGES & ARRISES WITH WATER ONLY**

The latest innovation in finishing and polishing processes... V2 WHEELS bring all the processing characteristics of our LP wheels, including increased line definition and bevel clarity, with an extraordinary advantage - they require only WATER!

## **NO CERIUM OXIDE REQUIRED**

V2 WHEELS have been specifically designed for slurry-less polishing. They eliminate the need for cerium oxide, using only water, which translates to:

- *Huge Cost Savings ... No cerium to buy*
- *Less Downtime & Maintenance*  
*... No cerium related failures*
- *No Mixing or Major Clean-Up*
- *Less Labor Costs*
- *No Cerium Storage Issues*

## **CLEANER PROCESS EXTENDED MACHINE LIFE**

V2 WHEELS allow for a cleaner work environment. And with the absence of cerium slurry, waste management issues are greatly reduced along with many of the health concerns raised by cerium oxide dust.

## **LONGER WHEEL LIFE**

V2 WHEELS are long-lasting... 2 - 3 times longer than traditional polish & prepolish wheels. Longer performance means less wheel changes and reduced downtime!
