CHILLMATE SERIES 200 SYSTEM

Our Chillmate Series 200 System revolutionizes optical laboratory performance by delivering:

- *Increased Cost Savings* • *Reduced Lens Processing Defects* • *Environmental Compliance*

This patented filtration system delivers controlled chilling, filtering and recycling easily, efficiently and economically. Made from high-grade stainless steel, the System utilizes a fully hermetic compressor and CFC free refrigeration system to maintain constant cool temperatures, eliminating unwanted fluctuations and dramatically reducing lens defects.

CHILLMATE 200

MULTI-VESSEL
FILTERING UNIT

The Chillmate Series 200 System is available for water or slurry, and is specifically designed for continuous circulation: 24 hours a day, 7 days a week of nonstop performance.

28 GALLON
POLYETHYLENE TANK

10 GALLON
STAINLESS STEEL TANK

CHILLMATE SERIES 200 SYSTEM FOR SLURRY OR WATER

APPLICATION	CAPACITY	FEATURES
SLURRY	6 - 14 SPINDLES	<ul style="list-style-type: none"> • CHILLMATE 200 WITH BAG FILTER & STAINLESS STEEL HOUSING • 3/4 HP PUMP WITH MOUNTING HARDWARE • 10 GALLON STAINLESS STEEL TANK WITH LID
WATER	6 - 14 SPINDLES	<ul style="list-style-type: none"> • CHILLMATE 200 • MULTI-VESSEL FILTERING UNIT WITH SIX 20" FILTERS • 3/4 HP PUMP WITH MOUNTING HARDWARE • 28 GALLON POLYETHYLENE TANK

In-line filtration and recycling decrease overall fluid consumption, extend polish life, eliminate destructive particles and residues, and insure compliance with federal environmental regulations. The Chillmate Series 200 System, like all our Chillmate Systems, can be used in conjunction with fining or polishing with the same optimum results.
