

OPHTHALMIC - EDGING & BLOCKING PADS

Universal Photonics offers a variety of premium pads, polishes and equipment for lens processing. To assure maximum satisfaction, we will gladly recommend a polishing system customized to meet your needs. In addition we can help you revolutionize laboratory performance with equipment specifically designed to increase lens quality while reducing operating costs. Contact us to learn more about our advanced line of consumable products, equipment systems and latest processing technologies.

EDGING & BLOCKING PADS			
UNI-BLUE	LC Series		Unique high strength, high-density blue carrier offers improved performance for today's longer processing times. Specially designed adhesive offers superior lens side and block side performance. Double tabbed for easy removal. Offered in shapes to match today's block styles and sizes.
3M LEAP II			Original Leap II pad manufactured by the 3M Corporation. The rigid neoprene foam base provides an excellent carrier for the adhesive system allowing for consistent performance.
EB-3 UNIVERSAL			Offers efficient, accurate blocking at a fraction of the cost of current systems. EB-3 pads are pressure sensitive, and are compatible with all edgers.
UNI-RED BLOCKING			Specially designed adhesive offers superior performance on all lenses including Hydrophobic and Oleophobic coatings. Will not twist or flex during processing. Defies tearing. Distinctive red release paper provides high visibility.
