

OPHTHALMIC POLISHING PADS - FINAL POLISH

Universal Photonics offers a variety of premium pads, polishes and equipment for lens processing. To assure maximum satisfaction, we will gladly recommend a polishing system customized to meet your needs. In addition we can help you revolutionize laboratory performance with equipment specifically designed to increase lens quality while reducing operating costs. Contact us to learn more about our advanced line of consumable products, equipment systems and latest processing technologies.

POLISHING PADS: CR-39, MID & HIGH INDEX, AND POLYCARBONATE

YELLOW SUPREME	VF Series		Yellow Supreme's premium flocked velveteen with heavy twill backing provides great strength in high speed, high pressure applications.
PREMIUM BLUE	VK Series		Ideal for all types of plastic lenses and polishing compounds. Slightly "rougher" flock fiber gives good surface stock removal, which then smoothes over during the polishing cycle to yield finely finished lens surfaces.
V-1 WHITE	VM Series		Compatible with all polishing compounds and especially suited for CR-39 and mid & high index lenses.
PINK SUPREME	VQ Series		High quality with superior flocking for less shredding and cleaner, longer lasting slurry. Available with high or low-tack adhesive.
