BEIGE**

Far thinner than ordinary microfiber, Luminex's ultrafine, micro-pocket properties trap residue, leaving the cloth's surface clear for continuous wiping. This "inner-trapping" property is created by the combination of capillary action within the ultrafine microfiber and the pressure difference of the wiping action. Luminex cloths are washable and reusable.

Perfect Finish

Contains no unstable filament. Surfaces are polished without any specks of lint left behind.

Luminex

Revolutionary Microfiber Technology
For cleaning eye glasses, camera lenses, CD's/DVD's,
binoculars.... Any surface requiring
optimum, but gentle cleaning.

Washable

Not treated with silicone or chemicals.
May be washed repeatedly and will
still retain all cleaning properties.

Gentle

Its super-fine construction is gentle on
all surfaces without being "slippery".
Cleans without scratching.
