

DURLON
DA/DB SERIES

DURLON has been developed to combine uniform thickness and maximum strength. Constructed with exceptional quality, 100% acetate fibers tightly woven to a satin finish as synthetic satin, **DURLON** minimal-compression fabric consistently produces a uniform finish.

APPLICATION & BENEFITS

- Pad is stable when wet.
- Especially recommended where surface heat generation in polishing may be a problem.
- **DURLON** discs offer a very low coefficient of friction.
- Not recommended for stock removal.
- For the final polishing use on most surface prepared materials with sub-micron powders or slurries.

PHYSICAL CHARACTERISTICS

PHYSICAL PROPERTIES & AVAILABILITY				
MATERIAL	SYNTHETIC SATIN		COLOR	WHITE
Size		Approx. Thickness	Thickness w/ PSA	
Pads/Discs	6" - 36"	N/A	.016"	
Sheets	54" x 70"			
Yardage	60" Width			
Pressure Sensitive Adhesive		When PSA is specified (pressure-sensitive adhesive), a polyester interface with down side adhesive protected by a removable paper, is applied. The bond to the lapping plate remains firm with various polishing vehicles including water, oil, alcohol, and most commonly used slurries, yet removes cleanly when changed.
