

# H-2000 SLURRY

BA0100, BA0100-HAS, BA0100NS, BA0100P

H-2000 utilizes various rare earth precursors which have been conditioned and processed to enhance settling and polishing characteristics with a narrow particle size range. This blend offers more acute polishing, which produces an unprecedented rapid stock removal and angstrom surface finishes.

## APPLICATION

Dilute H-2000 with water.

## BENEFITS

- Narrow particle size distribution
- Angstrom surface finishes
- Zirconium and Cerium Oxide blend
- Great for sensitive glasses
- Delivers excellent surface finishes

## PHYSICAL CHARACTERISTICS

TEST	H-2000
pH	5.5 - 7.5
Particle Count (D <sub>50</sub> , μm)	0.4 - 0.7
Particle Count (D <sub>max</sub> , μm)	<3.23
Solid Content (%)	10 - 20
Density (g/mL)	0.9927 - 1.1627

## AVAILABILITY

1 Gallon, 1 Quart, 1 Pint
