

RHODITE 90

BA0090, BA0090NS, BA0090K, BA00905

Rhodite 90 is a cerium based polishing powder comprised of rare earth oxides optimized for stock removal at an economical price. Rhodite 90 has been designed for polishing glass materials to commercial finish or better.

APPLICATION

Dilute **Rhodite 90** with water to create slurry. Preferred, but not required, water type is DI or RO water. Concentration can vary per operation. For best results, please consult with UPI technical staff to recommend optimal processing conditions.

Rhodite 90 is suitable for recirculatory central slurry systems for improved efficiency and reduction in costs.

BENEFITS

- Suspension treated
- Can be used on a wide array of applications
- Excellent stock removal performance
- Superior clean ability

PHYSICAL CHARACTERISTICS

TEST	RHODITE 90
pH	4.0 - 5.5
Particle Count D ₅₀ (µm)	0.5 - 5.0
+400 Mesh Screen (%)	<0.01

AVAILABILITY

1 lb Package, 20 KG Pail, 44lb Pail, 55lb Box
